Human organization  
With effective accuracy range

# Other Magnifier?

- Easily dirty;
- Easily loosen;
- Low compliance;
- Heavy\ pressing feeling ;
- Forehead weight concentrated;

# Aidite®

大家好，我是购买这个产品的客户，收到货不到一周，一直没有用，就刚收到时试了试。今天要用拿出来往头上戴的时候，也没用多大力，就和平常戴眼镜时一样。就从鼻梁处断裂了。这质量太脆弱了。请想要购买者三思。

---用户: 2\*\*\*M反馈 2019年8月10日

Today I wear glasses on the nose, the glass broke off at the bridge position. The quality is too fragile. Suggest other customer think twice to buy.---www.taobao.com

搞得挺复杂（吸引了我）放大效果不好。不如用放大镜直接看方便，效果并不减。这个钱花得很失败。

---用户: Y\*\*\*7 反馈 2019年7月12日

Structure complex, but magnification not good, not convenient as ordinary magnifying glass.

---www.taobao.com

质量太差，根本不管用

---用户: t\*\*\*9 反馈2019年7月15日

东西不是很实用，适用要求高的地方还是选专业的。

Poor quality

Not useful

---用户: t\*\*\*1 反馈2019年4月03日

看东西还是很模糊 (fuzzy)

各位同仁不要再买了,最垃圾的东西了。 (Rubbish)

质量一般 感觉不像正品连个说明书都没有 (General quality without instruction manual)

第三次买了, 镜片还可以就是塑料件质量太差了。。。 (Plastic parts are poor quality)

商品: 商品品质一般, 原本用于维修电子产品。没法用, 还是给五分。 (General quality)

服务: 挺快

质量很差, 看东西模糊不清, 不可买。 (Low quality and fuzzy)

货收到, 质量一般宣不对焦, 不实用。 (unuseful)

03.24

解释: 您好, 使用的时候根据个人的实际情况调整下观察距离哦, 倍数越高观察距离越近的, 清晰度非常好的呢!

Aidite®

ADVANTAGE

2.5X

Magnifying time 2.5, no edge deformation  
Long time wearing without dizzy while visual  
effect is very good.

Large lens area,  $\approx 20\text{cm}^2$

Excellent structural feature could perfectly match different operators pupil distance  
Effectively avoid eye distension or ocular pain

Aidite<sup>®</sup>

Operate distance ~30~40cm

- Extend structure
- Visible surrounding
- Not interfere to other operations
- Increased convenience and efficiency

Extremely light frame: Titanium alloy, long time wearing without facial indentation

# Aidite<sup>®</sup>

Widen nose pad design, no need to take off the myopic lens when the operator wears it.

Aidite<sup>®</sup>

Alleviate eye fatigue and  
prevent cervical vertebra disease

30~40cm working distance

2.5x power

Large lens area with extend  
structure

## Application

Cervical Margin Adjustment  
Grinding Metal,  
Grinding Ceramic,  
Layering Ceramic

Grinding

Staining & Glazing

Denture aesthetics

Quality control

## Jargon

Depth of field:  
In optics, particularly as it relates to film and photography, depth of field (DOF), also called focus range or effective focus range, is the distance between the nearest and farthest objects in a scene that appear acceptably sharp in an image. .

Avoid 'DOF' as a block to sales

Born with golden section ratio, make very thing is...

### Advantage

- Large lens area, suitable for operators with different pupil distance
- Magnification: 2.5x power
- Large working distance: 30~40cm
- Extremely light frame: Titanium alloy
- Alleviate eye fatigue and prevent cervical vertebra disease
- Widen nose pad design, no need to take off the myopic lens when the operator wears it.

Aidite®

These magnifying glasses are really suitable for technicians! They are light in weight so that when wearing them you don't feel dizzy. The magnifying effect is just right to satisfy most technicians' daily work.

Kang Chien-Ming (notable dental technician)。

More attention should be drawn to technician's occupational health.

When young technician newly starts denture producing work, he should give high attention to eye and cervical vertebra health. Forming a good operation habit in the work is really important.

These magnify glasses play a certain protective role in alleviating eye fatigue, avoiding excessive use of the eyes, ensuring a good sitting posture and reducing cervical pressure.

--- **Zhong Ding ( China denture aesthetic master )**

Aidite<sup>®</sup>

**These magnify glasses are truly good tool, especially convenient for elder people who gets presbyopia like me. I use it every day.**

**-- Yong Xu (China denture aesthetic master)**
